Nitrox: Trying to decide if it is right for you

What is Nitrox? Nitrox is air that has been enriched by taking away some of the nitrogen using a membrane system to release the excess gas or using a blending system to add more oxygen than the 21% which is found in air.

What are the benefits? By breathing an EAN (Enriched Air Nitrox) mixture you will absorb less nitrogen, therefore off-gassing time is shorter and you may feel less post-dive fatigue.

How do I become Nitrox certified? IT'S EASY! There is no need for new equipment (since we are diving a mix of less than 40% oxygen). It will take only about 4 hours of your time, conveniently scheduled between dives. Ask one of our dive crew and we will be happy to complete your course on your liveaboard cruise!

32% Enriched Air Fills can be purchased on board at the following rate:	Seven night charters	Unlimited
32% fills > US \$150.00	Per fill a la carte > US \$10.00	Ten/Eleven night
charters Unlimited 32% fills > US \$200.00	Per fill a la carte > US \$10.00	

Enriched Air Full Certification: (includes instruction, classroom materials and two supervised enriched air dives).  
Certifications may be PADI or TDI (depending on which instructor is teaching the course). \$150.00

32% Enriched Air Fills following onboard Enriched Air Full Certification will be offered at these discounted rates:  
For seven night trips: \$50  
For ten night trips: \$75

Enriched Air Completion Dives: (includes two supervised enriched air dives). Certifications may be PADI or TDI (depending on which instructor is teaching the course). \$50.00
